Nuclear Regulatory Commission

RE: Draft Nebraska IMPEP Report

Dear Dr. Roldan-Otero:

Following are a few minor comments about the draft Nebraska IMPEP report. It does not appear that any of these items would change the substance of the report.

3.3 (b) – The first paragraph states that the “team interviewed one inspector because the other two inspectors had retired prior to the IMPEP.” Only one inspector retired, the other inspector left the program for another job opportunity.

3.4 (b) – The second paragraph states, “licensing actions are reviewed by a secondary reviewer who is qualified to perform that type of review.” While this is typically the case, at the current time we only have one qualified individual to perform reviews. At the present time, the one qualified individual reviews all licensing actions and the two staff that are working to be qualified also review them. There are always two reviewers (the reviewer and the peer reviewer) and in most cases right now there are three reviewers. During our next IMPEP, there will be reviews of licensing actions that have been looked at by a secondary reviewer who was not qualified.

Appendix B – The inspector initials are BH (Becki Harisis) in appendix B. It was actually BM (Bryan Miller) who was the inspector. BH is not yet qualified to do inspections.

Please contact me at becky.wisell@nebraska.gov or 402-471-0928 if you have any questions.

Sincerely,

Becky Wisell, Interim Deputy Director
Health Licensure and Environmental Health
Division of Public Health
Department of Health and Human Services
